April 21, 2017

Dear Compliance Manager:

The purpose of this letter is to inform you that on August 17, 2016, the U.S. Department of Energy (DOE) adopted an amended federal test procedure for all consumer wine chiller models. [See, 10 C.F.R. Section 430.23(a) – Appendix A to Subpart B of Part 430.] A copy of the changes is available at:

<https://www.regulations.gov/document?D=EERE-2013-BT-TP-0029-0022>.

Beginning on January 17, 2017, any disclosure of data or energy representations for new consumer wine chiller models, including certification to the Modernized Appliance Efficiency Database System (MAEDBS), must reflect data obtained from the new federal test procedure.

All consumer wine chiller models that were properly certified to MAEDBS using the previous test method prior to January 17, 2017 will be archived in the Historical Database. Units of models previously certified may continue to be sold or offered for sale; however, all models or changes to models certified on or after January 17, 2017 must follow the new test procedure.

Questions on how to conduct the search of MAEDBS, or on the contents of this letter, can be directed to our email address at Appliances@energy.ca.gov or to the Appliances Call Center, toll free at (888) 838-1467, or outside California at (916) 651-7100, 9:00 a.m. to 4:30 p.m. PST Monday through Friday, except state holidays.

Sincerely,

A handwritten signature in cursive script that reads 'Leah Mohney'.

Leah Mohney
Supervisor
Appliances Unit
